

This document contains key information for investors regarding the closed-end investment company INVL Technology (hereinafter – the CEIC). It is not marketing material. The provision of this information is required by law to help you understand the nature and risks of investing in this CEIC. You are advised to read it so that you can make an informed investment decision.

Special closed-end private equity investment company INVL Technology

ISIN: LT0000128860

This CEIC is managed by INVL Asset Management UAB (hereinafter – the Management Company), owned by Invalda INVL AB.

Objectives and Investment Policy

The objective of the CEIC is to ensure a stable as high as possible return on investments for the benefit of shareholders by taking greater-than-medium risk.

The CEIC will invest shareholders’ accumulated money in information technology companies which are registered or operate in a member state of the EEE, OECD and in Israel.

At least 70 per cent of the net assets of the CEIC shall comprise (directly and/or indirectly) of blocks of securities, issued by newly established and/or currently operating information technology companies, which enable control or significant influence over the companies. Not more than 30 per cent of the CEIC’s net assets may be invested in the transferable securities or money market instruments of a single company. Not more than 30 per cent of the CEIC’s net assets may be invested in deposits, derivative financial instruments or investment units of collective investment undertakings. Some of the CEIC’s assets may also be held in cash.

If needed, and in order to achieve a higher investment return, the CEIC may borrow money for the additional financing of entities in which it invests. In this event, the CEIC’s debt may not exceed a maximum of 80 per cent of its net asset value.

The CEIC will invest for a defined period of time and will seek to profitably sell the acquired securities at the end of the CEIC’s life. The method for managing the CEIC’s investment portfolio is based on the identification of mature IT companies which develop solutions for large businesses and public-sector clients, have production capacity in the Baltic countries and Eastern and Central Europe and offer synergy potential for collaboration with the CEIC’s other companies, and

rationalization of the investment portfolio. For the sake of operational efficiency and investment control, investments selected by the managers of the CEIC shall be approved in advance by an investment committee established by the board of the Management Company. In addition, in order to increase return on investments and ensure investment supervision, the Management Company will contribute to the development and value creation of the companies in which the CEIC invests and will seek to participate in the management of the investment objects as a supervisory body member or in other form. If necessary, the Management Company will delegate professionals of impeccable reputation from the respective field to the management bodies of companies in which the CEIC invests.

The CEIC’s strategy does not foresee a benchmark index.

The CEIC is intended for investors with extensive investment experience who can tolerate greater-than-medium long-term risk. Before investing, non-professional investors are advised to consult with public trading intermediaries or other specialists in this field. Shareholders of the CEIC can transfer CEIC shares to other persons.

Income of the CEIC may be distributed: a) to cover costs related to the activities of the CEIC; b) for reinvestment; c) as dividends; d) to redeem shares of the CEIC.

Redemption of the CEIC’s shares is restricted. During the life of the CEIC, its shares will not be redeemed at the demand of shareholders except in cases where all of the conditions foreseen in the CEIC’s Articles of Association for mandatory redemption of the CEIC’s shares are met (see Chapter VII of the Articles of Association).

Risk and Reward Profile

The indicated risk-return category shows the relationship of risk and reward for the CEIC. A higher category means a higher likely return but also a higher risk of losing money. The lowest category does not mean risk free.

The risk-return category cannot be calculated accurately for the CEIC due to specifics of its activity (the CEIC’s strategy does not foresee a benchmark index and it has been operating for less than 5 years), which is why the CEIC is assigned to the highest category – 7. That means the risk of changes in the value of the shares of the CEIC is very high.

The risk-return category shown is not guaranteed and may

rise or fall over time (the CEIC may be reassigned to a different category). Following are the key types of risk that are significant for the future prospects of the CEIC and its activities:

Counterparty risk. The risk that the counterparty to a transaction will fail to perform its obligations.

Liquidity and technology market changes risk. The risk that it may be difficult to sell financial instruments of an entity in which the CEIC has invested at a particular time and for the desired price.

Currency risk. The risk that the value of investments will be reduced by unfavourable changes in exchange rates.

Operational risk. The risk of experiencing losses due to system failures, human error or external events, including geopolitical, political and legal risk.

All the investment risks for the CEIC are presented in the CEIC’s Articles of Association (see section 5, pages 8-11).

Charges

The charges you pay are used to cover the costs of running the CEIC, including expenses related to marketing and distributing its shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after investing in the CEIC:	
Distribution fee	none
Redemption fee	none
This is the maximum percentage that might be deducted from the money invested by an investor.	
Charges taken from the assets of the CEIC in one year:	
Ongoing charges	2.49%
Charges taken from the CEIC under certain conditions:	
Success fee*	20.00%

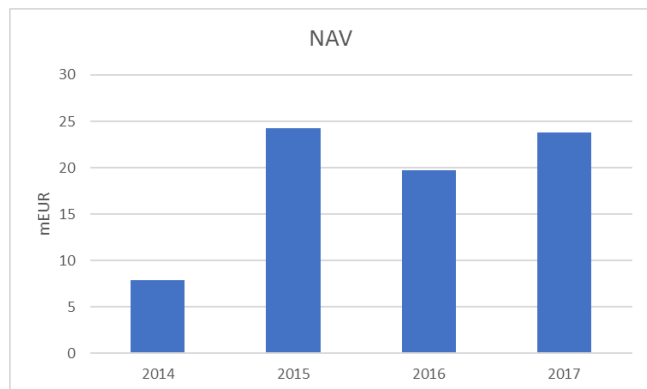

* The success fee is payable to the Management Company if the achieved Internal Rate of Return (IRR) of the CEIC is greater than 8%; for more information about the success fee, see the CEIC's Articles of Association (item 153).

The total expenses covered from the assets of the CEIC and related to the CEIC's activities will not exceed 4 per cent of the CEIC's average annual net asset value. Should the company's average annual net asset value fall to EUR 2.5 million or less, total expenses covered from the assets of the CEIC and related to its activities will not exceed EUR 100,000. The CEIC is a newly established collective investment undertaking and has no history of charges assessed for any previous financial period.

The size of ongoing charges is calculated on the basis of the CEIC's operating expenses in the previous financial year; it may change each year. It does not include costs of transactions with assets of the CEIC except when, in buying or selling investment units of another collective investment undertaking or shares in the name of the CEIC, sale and/or redemption fees are paid out from the CEIC's assets.

More information about charges that apply is provided in the CEIC's Articles of Association (see pages 21-24, chapter 12 "Structure of the Company's Costs and Manner of Covering Them"), available on the website: www.invltechnology.lt.

Past performance

The license of the CEIC was issued on 14 July 2016.

Performance is and will be calculated in euros.

Past performance of the CEIC will be expressed as the change of the CEIC's net asset value during a calendar year. The CEIC does not track a benchmark index.

Past performance is no guarantee of future performance. The value of the CEIC's shares may rise or fall. You should be warned that past performance data is of limited value for anticipating future performance.

Practical information

The CEIC's depository is SEB Bankas AB.

More detailed information regarding the CEIC and its Articles of Association, along with annual and semi-annual reports in the Lithuanian language, is provided free of charge to investors of the CEIC who desire it on working days at the offices of INVL Asset Management UAB in Vilnius (Gynėjų St. 14), Kaunas (Savanorių Pr. 349) and Klaipėda (Minijos Str. 19).
